
- Analysis By Volume (Thousand Tones), By Value (USD Million)
- By Product (Electrodeposited Copper Foil and Rolled Copper Foil)
- By Industry (Printed Circuit Boards, Lithium-ion Batteries, Electromagnetic Shielding)
- By Application (Automotive, Industrial Equipment, Building & Construction, Electrical & Electronics, Others.)
- By Region – North America, Europe, Asia Pacific.
- By Country – USA, Canada, Germany, Italy, France, Spain, China, Taiwan, South Korea, Japan.
Scope of the Report – Global Copper Foil Market

Global Copper Foil Market

By Product
- Electrodeposited Copper Foil
- Rolled Copper Foil

By Industry
- Printed Circuit Boards
- Lithium-ion Batteries
- Electromagnetic Shielding

By Application
- Automotive
- Industrial Equipment
- Building & Construction
- Electrical & Electronics
- Others

Regional Analysis
- North America
- Europe
- APAC

Country Analysis
- USA
- Canada
- Germany
- Italy
- France
- Spain
- China
- Japan
- Taiwan
- South Korea

Historical Period 2015-2019

Forecast Period 2020 - 2025
Overview Of Global Copper Foil Market

Growth rate of Global Copper Foil market from 2020 to 2025 will be **11.90%** in terms of value and **x%** in terms of volume.

Printed Circuit Board is the leading segment in year 2019 with the market share of **x%** across the globe as the copper foil plays an important role in conduction and heat dissipation in Printed Circuit Board.

Electrodeposited Copper Foil is the leading segment in year 2019 with the market share of **x%** across the globe.

The copper foil industry is characterized by the presence of small and mid-sized companies that are not capable enough to compensate for the gap in the demand and supply of copper foil.

Electrical & Electronic Segment leads the Copper Foil market due to increase in demand for consumer electronics as well as in the power & energy sectors.

Global Copper Foil industry facing supply-demand imbalance with low production capacity of copper foil, mainly because of the huge demand from secondary batteries.

Asia Pacific region occupied the largest share of **x%** in terms of value and volume in the global Copper Foil Market, owning to owing to inexpensive labor, shipping cost and well established manufacturing infrastructure.

Growth rate of Global Copper Foil market from 2020 to 2025 will be **11.90%** in terms of value and **x%** in terms of volume.

Printed Circuit Board is the leading segment in year 2019 with the market share of **x%** across the globe as the copper foil plays an important role in conduction and heat dissipation in Printed Circuit Board.

Azoth Analytics
Creating new knowledge
The growing demand for electric vehicles on account of rising crude oil prices, rapid development in the electrical and electronic industry, and a surge in automotive production are the factors that drive the market growth.

In addition, the rise in hybrid vehicles, especially in the European market, is likely to augment the market growth.

**Global Copper Foil Market Forecast, By Value: Year 2020-2025**

The increasing adoption of copper foils in the manufacturing of printed circuit boards (PCBs) and lithium-ion batteries is expected to offer lucrative opportunities to the manufacturers of copper foils.

The copper foils have gained prominence owing to lightweight nature and high performance in end-use industries.
Copper foils are commonly used as a conductor in printed circuit boards (PCBs) and flexible connectors. Copper has high electric conductivity and is also ductile and malleable.

This makes copper one of widely used metals in the emerging electric & electronics industry. This, in turn, is expected to drive the copper foils market in coming years.

The rising sale of electric vehicles in countries such as the US, China, Japan, Spain, Germany and France are likely to boost the production of copper foils.

Due to Covid 19 epidemic electric vehicle manufacturing plants are being shuttered around world, and vehicle sales are being dropped. This has caused a major impact on copper foil industry as copper foil are considerably used in the electronic applications.
China dominates the copper foil market in the Asia Pacific Region. In the rapid development of today's electronic information industry, electrolytic copper foil is called neural network for transmission and communication of signals and power of electronic products. Since 2002, China printed circuit board production value has surpassed the third place in the world. As a result, China electrolytic copper foil industry has developed rapidly in recent years.
On the basis of the Product, xx Copper Foil segment gains a considerable share over the projected period on account of the increasing demand for electrodeposited copper foil applications in rigid circuits and batteries.

Furthermore, increasing PCB production in consumer electronics has led to strong demand for electrodeposited copper foil, thereby expected to drive the global copper foil market.

Global Copper Foil Market
On the basis of the Industry, Printed Circuit Board segment gains a considerable share. The Internet of Things (IoT) offers new opportunities for consumer electronics manufacturers. The number of devices connected to the Internet has risen in the last decade. Wearable devices, such as smart watches, have seen tremendous growth.

Wearable Devices combines flexible sensors and chips for easy confinement to the human body. This will necessitate a revolution in developing and manufacturing technologies, which will have a greater impact on the Printed Circuit Board market. Therefore the growth in PCB market will influence cooper foil market growth.
On the basis of the Application, Electrical & Electronics segment gains a considerable share.

Electronic industry is witnessing major traction these days. With every passing day, manufacturers are developing and launching new products that can have specific or multiple application in both industrial and domestic domain. This growth of the industry is also a crucial parameter responsible for the growth of global copper foils market.
Asia Pacific is the xxx market for Copper Foil and is expected to remain in forecast period with a market share of xxx% growing at a CAGR of xxx% during the period 2020-2025.

The market growth can be attributed to the rapid urbanization leading to rising demand for electronics products among consumers.
xx leads the Copper Foil Industry.

On December 10, 2018 KCFT signed a long term 800 billion won worth copper foil supply contract with a global battery manufacturer in Korea. The copper foil produced by the advanced technology of KCFT is used as the electrode collectors for anodes in lithium ion battery. KCFT is supplying.............
About Azoth Analytics Pvt Ltd.

Azoth Analytics (ISO 9001:2015) is a business research and analytics company that creates in-depth research reports and provides customized research solutions and consulting services. An ISO 9001:2015 certified company, Azoth Analytics adheres to international quality management standard and has strong commitment to a culture of continuous improvement. The business research and market analysis of Azoth Analytics helps organizations across different industry verticals solve their business problems. Strategic market sizing and data dredging techniques include secondary research, and primary research (interviews with management personnel and industry experts). Azoth Analytics provide syndicated and customized market research reports on different verticals including pharmaceutical and healthcare, oil and gas and power, chemicals, automotive, technology, FMCG, food & beverages and media sectors.
